

QUALITY AND SAFETY POLICY

To focus more and more attention on the environment, safety and health on the work place, orienting the research and development to ecofriendly formulations and with low risk to workers and users health, with natural-vegetal origin ingredients, and to packaging reduction through reuse, recycle and retrieval.

To make understand, act and sustain at all levels inside and to all the stakeholders the Quality and Safety Policy, and the general target prefixed by Senior Management.

Determine and assign roles and responsibilities at all levels, in order to inform, involve and make human resources aware of their responsibilities towards the quality and safety aim achievement.

Define training plans to reach the human resource quality and safety grade that allows the targets achievement.

To define and implement control and monitoring programs, in order to prevent non-compliances, accidents and injuries as well as to lower non-quality/unsafe condition costs and to improve the production, customer service and the workplace in order to reach the best price-quality ratio, respecting in force laws and regulation.

To activate continuous improvement processes of the company quality and safety system, of customer satisfaction, health and safety at work, internal and external communication, resource management, process indicators, implementation and application of in force laws and regulations.

Formalize activities that influence Quality and Safety, Good Manufacturing Practices, and Halal standards to provide objective evidence of control and monitoring through process indicators and allowing the continuous system improvement.

To measure during Management Review the adequacy, respect and effectiveness of the company quality and safety system and the achieving of prefixed targets, in continuous improvement perspective.

To activate continuous expansion strategies on the European and International market, pursuing a Quality and Safety Policy aimed to offer to the customer a high-level product/service, able to completely satisfy his expectations and aimed at guaranteeing the salubrity of the workplace.

The offer to the customer is configuring in both the capacity to understand and identify with high accuracy customers' needs and eventual critical areas, and ensuring high quality products/services.

All Allegrini S.p.A. staff, at any level, is responsible of the punctual application of prescription in this manual and in operative and management procedure. Therefore, everyone is responsible, according to his own mansions, of the company quality system and of the product to be supplied.
